

# BLOCK, G.

## SURFACE

Saturn -no solid surface

Made up of gases

Surface gas is ammonia—poisonous

Surface VERY cold -150 degrees C anywhere—coldest spot on Earth is much warmer

Very windy 1000 miles per hour

## RINGS

rings looks solid but made up of millions of pieces of rock

gravity gives rings their shape

## MOONS

60 known moons, maybe more not yet discovered

Titan is biggest

Aegaeon smallest

Even smaller exist-- called moonlets—like baby moons
